DBMS A database management system is the software system that allows users to define, create and maintain a database and provides controlled access to the data.

<http://ecomputernotes.com/fundamental/what-is-a-database/advantages-and-disadvantages-of-dbms>

Database Management Systems has quickly become one of the leading texts for database courses, known for its practical emphasis and comprehensive coverage.

<http://pages.cs.wisc.edu/~dbbook/>

A database management system (DBMS), sometimes just called a database manager, is a program that lets one or more computer users create and access data in a database.
